Aarne Thompson Classification System Wikipedia

Index used to classify folk narratives. The Aarne-Thompson-Uther Index (ATU Index) is a catalogue of folktale types used in folklore studies. The ATU Index is the product of a series of revisions and expansions by an international group of scholars: Originally composed in German by Finnish folklorist Antti Aarne (1910); the index was translated into English, revised, and expanded by American folklorist Stith Thompson (1928, 1961); and later further revised and expanded by German ...

Aarne-Thompson-Uther Index - Wikipedia

From Wikipedia, the free encyclopedia. The Aarne-Thompson classification systems are indices used to classify folktales: the Aarne-Thompson Motif-Index (catalogued by alphabetical letters followed by numerals), the Aarne-Thompson Tale Type Index (cataloged by AT or AaTh numbers), and the Aarne-Thompson-Uther classification system (developed in 2004 and cataloged by ATU numbers).

Aarne-Thompson classification systems — Wikipedia ...

The Aarne-Thompson system of classification of folktales is a universally accepted system taught at the academic level. One person (Uther) cannot decide to revamp this system and hijack the wiki page for the Aarne-Thompson system to promotion of their own, not universally or peer-edited, version and expect that to hold to referenceable standard.

Aarne-Thompson classification system, to help folklorists identify recurring plot patterns in the narrative structures of traditional folktales; Arn (disambiguation) Arne (name)

Aarne - Wikipedia

The Motif-Index of Folk-Literature is a six volume catalogue of motifs, granular elements of folklore, composed by American folklorist Stith Thompson (1932-1936, revised and expanded 1955-1958). Often referred to as Thompson's motif-index, the catalogue has historically received extensive use in folklore studies, where folklorists commonly use it in tandem with the Aarne-Thompson-Uther Index, an index used for folktale type analysis.

Motif-Index of Folk-Literature - Wikipedia

Stith Thompson (March 7, 1885 – January 10, 1976) was an American scholar of folklore. He is the "Thompson" of the Aarne-Thompson classification system, which indexes certain folktales by their structure and assigns them AT numbers. He also developed an alpha-decimal motif-index system (A~Z followed by numeral) for cataloging individual motifs.

Stith Thompson - Wikipedia

Background. Antti was a student of Kaarle Krohn, the son of the folklorist Julius Krohn. He further developed their historic-geographic method of comparative folkloristics, and developed the initial version of what became the Aarne-Thompson classification system of classifying folktales, first published in 1910 and extended by Stith Thompson first in 1927 and again in 1961.

Antti Aarne - Wikipedia

It is a type B124 folktale in the Aarne-Thompson classification system. Traditional versions. Illustration from J. Jacobs, English Fairy Tales (New York, 1895) "The Three Little Pigs" was included in The Nursery Rhymes of England (London and New York, c.1886 ...
