Bmw M42 Engine Specs Thediyore

The BMW M42 is a DOHC four-cylinder petrol engine which was produced from 1989-1996. It is BMW's first mass-production DOHC engine and was produced alongside the BMW M40 SOHC four-cylinder engine as the higher performance engine. The M42 was replaced by the BMW M44, which was introduced in 1996.

Read Book Bmw M42 Engine Specs Thedivore

Compared with the M40, the M42 features a DOHC valvetrain, a timing chain, hydraulic valve lifters and an increased 10.0:1 compression ratio. Later versions of the M42 also feature a dual length intake m

The Divore **Information (E30)**

The new M42 Engine includes a two-section "Differential Air Intake System" (D.I.S.A.) and an adaptive-selective knock control system as well as other design changes. With these changes the revised M42 engine develops 137 hp (103 kW) at 6000 rpm and a maximum torque of 175 Nm (129 lb-ft) at 4600 rpm.

Series

BMW M42 is a 4-cylinder straight engine which was developed on base of M40B18. The main difference between two motors is the fact that new version has more efficient aluminum 16-valve cylinder head. It uses two camshafts as well as optimized combustion chambers. M42 is still equipped with hydraulic lifters.

Automotive petrol engines. BMW is well known for its history of inline-six (straight-six) engines, a layout it continues to use to this day despite most other manufacturers switching to a V6 layout. The more common inline-four and V8 layouts are also produced by BMW, and at times the company has produced inline-three, V10 and V12 engines.. Prototype
