Roots, Stems and Leaves Chapter 23 Biology – Miller • Levine Specialized Tissue in Plants The three organs of a plant are the roots, stems and leaves The three tissue systems of a plant are dermal tissue, vascular tissue, and ground tissue A special type of tissue called meristematic tissue is the only plant tissue that can produce new cells by mitosis Found in the tips of shoots and roots ...

Roots, Stems and Leaves

a plant stem structure that contains xylem and phloem tissue: pith: parenchyma cells inside the ring of vascular tissue in dicot stems: primary growth: the type of plant growth that occurs at the tips of roots and shoots: secondary growth: the pattern of plant growth in which stems increase in width: vascular cambium

Quia - Chapter 23:Roots, Stems and Leaves

23-3 Stems Stems have three important jobs. They produce leaves, branches, and flowers. They hold leaves up to the sunlight. They also carry water and nutrients between roots and leaves. The arrangement of tissues in a stem differs among seed plants. In monocots, vascular bundles are scattered throughout the stem. In dicots and most gymnosperms,

Chapter 23 Roots, Stems, and Leaves Summary

Chapter 23 Notes Roots Stems Leaves I. Specialized tissue in plants - effective way to ensure the plant's survival A. Seed plant structure 1. Roots - a. Absorbs water and dissolves nutrients b. anchors plant to the ground 2. Stems - support system and transport system 3. Leaves - Photosynthetic system 4. Tissue system - three

The Roots, Stems, and Leaves chapter of this Prentice Hall Biology Textbook Companion course helps students learn essential biology lessons of roots, stems, and leaves.

Prentice Hall Biology Chapter 23: Roots, Stems, and Leaves ...

Chapter 23, Roots, Stems and Leaves . Pages 499-502: Stems . The stems of most dicots are arranged in vascular rings, while the stems of dicots have vascular bundles distributed throughout the stem tissue. The result is a unique arrangement of stem tissue in woody perennial (such as trees) dicots as they accumulate growth rings.
