model of protocols.
Protocol specification
requires a clear
definition of both the
services to be provided
by a given protocol
layer and the protocol
entities within the layer
that cooperate to
provide the service.
Verification, then,

Online Library Communication

consists of two parts:
(1) showing that the

Specification ...

Reusable protocol verification is exactly what it sounds like: the use of FPV properties that describe a particular communication protocol.

Protocol Verification

- an overview |

ScienceDirect Topics

Protocol Specification and Verification . In the

Online Library Communication

1980s, we observed that a data link (or transport layer) protocol typically performs multiple functions. This observation led us to ask some fundamental questions, such as: What is meant by protocol A being an abstraction of protocol B ?

Verification ...

Summary: Protocol verification is a process of checking whether the interactions of protocol entities, according to the protocol specification, do indeed satisfy certain properties or conditions which may be either general (e.g., absence of deadlock) or specific to the particular protocol system directly derived from the specification.
