One way to assess the environmental footprint of the service sector is to determine the impacts caused by an employee at work. Seventeen independent life-cycle assessments were reviewed [107], with the conclusions summarized in the following table. The lowest and highest carbon footprints among the seventeen companies were, respectively, 3.1 and 21 metric tons of CO<sub>2</sub>e per employee per year ...

Iyyanki V. Muralikrishna, Valli Manickam, in Environmental Management, 2017 Abstract. Environmental accounting, also called green accounting, refers to modification of the System of National Accounts to incorporate the use or depletion of natural resources. Environmental accounting is a vital tool to assist in the management of environmental and operational costs of natural resources.

### Environmental Accounting - an overview | ScienceDirect Topics

Environmental policy is the commitment of an organization or government to the laws, regulations, and other policy mechanisms concerning environmental issues. These issues generally include air and water pollution, waste management, ecosystem management, maintenance of biodiversity, the management of natural resources, wildlife and endangered species. ...
