far one of the most colorful and diverse groups of animals in the sea is that of the coral reef fishes. Their extensive range of bright colors and bold patterns is virtually unmatched in the entire undersea kingdom. And although they may be beautiful to behold, there is a real function behind each of these designs.

## **Coral Reef Life on Sea and Sky**

Among coral reef animals, invertebrates (animals without “backbones”) are by far the most diverse and numerous. They are the primary builders of coral reefs and an integral part of almost every aspect of the ecology of coral reef ecosystems. Even a summary treatment of what is currently known about the
