If you're a longtime photographer who comes from the days when manual exposure was the only game in town, you may prefer to stick with this mode. If it ain't broke, don't fix it, as they say. And in some ways, manual mode is simpler than the semi-auto modes because if you're not happy with the exposure, you just change the aperture, shutter speed, or ISO setting on your D3100, D5100, or D7000 and shoot again.

### Setting Advanced Exposure Modes on a Nikon DSLR - dummies

I have a most vexing problem. I have a Nikon d5100 (roughly a year old) which up until two days ago handled exposure and metering just fine. However, at night, in a well lit room (florescent bulbs) in which I NEVER had problems capturing images at reasonable shutter speeds, apertures and ISOs (< 400), here's what's happening now:
