Safari is a magical journey using never-before-seen Photicular technology, and the result is breathtaking. Readers, as if on safari, encounter eight wild

Online Library Safari A Photicular Book

animals that come alive. Using an innovative lenticular-based technology, precision sliding lenses, and original four-color video imagery, each image is like a 3-D movie on the page, delivering a rich, fluid, immersive visual experience.

This is the basis for Motion Viewers, and for "Safari: A Photicular Book". Modern photicular has become a medium size industry, with mostly commercial applications, although there is a core group of artists that work in the medium. For a very detailed history, see Dave Roberts' online piece on the Lenstar site.
