The butterfly effect refers to the theory that a minute action can cause large effects, as in the flap of a butterfly's wings in Brazil can cause a tornado in Texas. Tap to play or pause GIF Tap to...

### 19 People Share Their "Butterfly Effect" Stories And You ...

The butterfly effect is the idea that small things can have non-linear impacts on a complex system. The concept is imagined with a butterfly flapping its wings and causing a typhoon. Of course, a single act like the butterfly flapping its wings cannot cause a typhoon. Small events can, however, serve as catalysts that act on starting conditions.

### The Butterfly Effect: Everything You Need to Know About ...

His theory, called The Butterfly Effect, stated that a butterfly could flap its wings and set air molecules in motion that in turn would move other air molecules — which would then move additional air molecules — eventually becoming able to influence weather patterns on the other side of the planet.

### The Butterfly Effect - Andy Andrews

This idea is called the butterfly effect, and in the natural world, it happens all the time: A small and seemingly insignificant event spirals outward, creating massive and complex changes in the world around us. And we each have a role to play. If 2020 has taught us anything, it's that small actions and choices have large impacts.
